

INSIDER THREATS 101

WHAT YOU NEED TO KNOW

DEFEND TODAY,
SECURE TOMORROW

OVERVIEW

Organizations of all sizes are vulnerable to an insider threat. An insider threat is the potential for an insider to use their authorized access or special understanding of an organization to harm that organization. This harm can include malicious, complacent, or unintentional acts that negatively affect the integrity, confidentiality, and availability of the organization, its data, personnel, facilities, and associated resources.

BUILDING AN INSIDER THREAT MITIGATION PROGRAM

Successful insider threat mitigation programs employ practices and systems that limit or monitor access across organizational functions. Insider threat mitigation programs need to be able to detect and identify improper or illegal actions, assess threats to determine levels of risk, and implement solutions to manage and mitigate the potential consequences of an insider incident. Organizations should form a multi-disciplinary Threat Management Team to create an Incident Response Plan, ensuring their response to an insider incident or potential threat is standardized, repeatable, and consistently applied.

To effectively establish an insider threat management program, organizations should:

Obtain Support from Organizational Leadership

Start small—leverage existing capabilities and resources.

Define the purpose of the program, and highlight the return on investment by revealing what could be lost in a successful insider threat incident.

Identify what the organization values, and its physical and intellectual critical assets to protect against insider threats.

Maintain Pathways for Reporting

Develop a culture of shared responsibility designed to help the individual and the potential insider.

Develop confidential reporting pathways that are easy to find, understand, and use.

Provide Training and Awareness

Train employees to recognize insider threat indicators and the concerning behaviors that could lead to an incident in the organization.

Insider Threat Quick Facts

Median cost of a malicious cyber insider threat incident in 2018:

\$4.45 million

(taking 314 days to identify and contain)

Source: IBM Security 2019 Cost of a Data Breach Report.

90%

of cybersecurity professionals believe their organizations are vulnerable to insider threats

Source: Crowd Research Partners, Insider Threat 2018 Report.

2 million people

report some type of workplace violence each year

Source: OSHA, Workplace Violence Fact Sheet, 2002.

25%

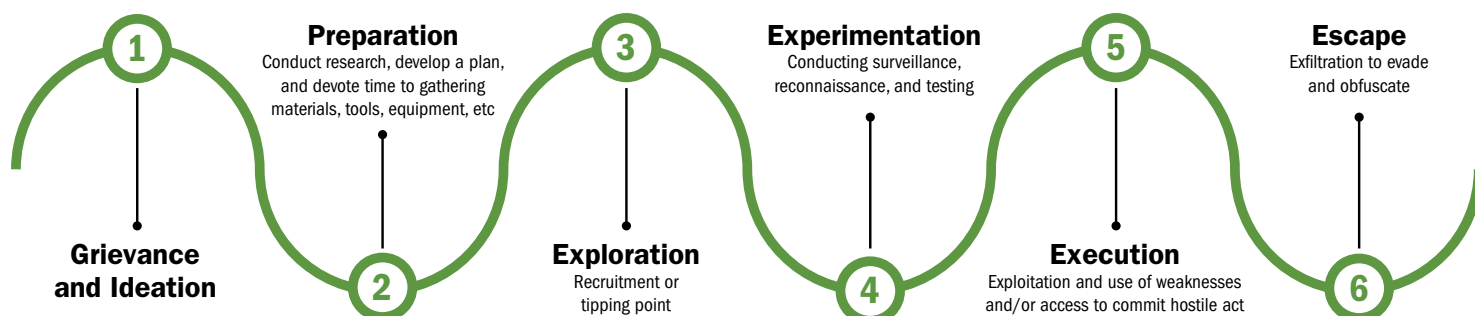

of workplace violence goes unreported

Source: AlertFind, Workplace Violence Statistics 2018.

Progression of an Insider toward a Malicious Incident

Malicious insider activity is rarely spontaneous; it is usually the result of a deliberate decision to act. A potential insider threat progresses along an identifiable pathway to a malicious incident.¹ A deeply held grievance or humiliation, whether real or perceived, is often the first step on a journey toward intended violence.²

Top Six Sectors for Fraud, Sabotage, and Theft of Intellectual Property

Everybody is the insider threat team, not just the police or security personnel. It is everyone's responsibility to keep the agency and the mission safe."

² Grievance as used here should be distinguished from the formal filing of a grievance by an employee based upon instances of discrimination or other inappropriate workplace conduct directed at them. The filing of a formal grievance should not be construed as indicative of an insider threat.
